

Momentum EHR

Smart Electronic Health
Records: Resident
information, at your
fingertips, instantly

Momentum EHR is dynamic electronic health record software that streamlines your organization's delivery of high-quality and personalized care.

As a flexible multi-sector software program, Momentum EHR is essential to assisted living, home care, community care, mental health, and public health organizations.

Momentum EHR allows your care team to easily manage, assess, monitor, plan, and document your resident's care.

Web-based, mobile friendly and available in French!

Momentum EHR

Momentum EHR:

Heavily relied on by national care organizations, regional health authorities, provinces, and states, Momentum EHR is a strong and stable software program that will revamp your delivery of care. At its' core, Momentum EHR is a software platform that documents client or resident information, and is an all encompassing resource that staff use to provide exceptional care.

Secure and web-based, Momentum EHR minimizes your hardware requirements, and allows for seamless support from Momentum Healthware's Support Team, as dedicated remote servers are used. Momentum EHR is also easily modifiable to adapt to your organization's workflow, to reduce growing pains during implementation, and to increase the usage of all features. Additionally Momentum EHR has a user friendly interface, is mobile friendly, and available in French.
